McLuhan Program in Culture
and Technology, University of
Toronto*

**October 31, 2002
Thursday 4:00 pm**

Auditorium, Beckman Institute
405 N. Mathews Ave., Urbana
University of Illinois at Urbana-Champaign

Architectures of Intelligence

The Technologies of Mind from the Alphabet to the Internet

Derrick de Kerckhove is a pioneer and futurist in digital technology and virtual reality whose theory of connected intelligence has gained worldwide notoriety in the search for a new electronic alphabet. He pushes at the frontier of cyberspace in terms of the physiology and psychology of human cognition to ask whether there is a mental space that can be multiplied mind-by-mind distinct from physical space and mediated by virtual space.

Sponsored by:

Beckman Institute for Advanced Science
and Technology
