and Child Health, University
of Illinois at Chicago*

October 12, 1998

Monday 4 pm

Third Floor, Levis Faculty Center
919 West Illinois Street, Urbana
University of Illinois at Urbana-Champaign

Increasing the Odds

Improving Outcomes in Premature Brain-Injured Infants

Although the survival rates of premature infants have increased, these children still remain at risk for school failure and developmental delays, particularly movement disorders such as cerebral palsy. Rosemary White-Traut combines stress-reduction programs with multisensory stimulation to improve developmental outcomes for these high-risk infants.

Sponsored by:
College of Nursing
