Tracking Down the Enjoyment Expression

Paul Ekman has revolutionized our ability to study human facial expression by developing a method that uses detailed quantitative measurements of those expressions. Dr. Ekman uses this tool in extensive anthropological work to determine which emotional expressions are universally understood and which are culturally bound. He has meticulously defined the specific expressions associated with different emotions having wide-reaching implications for such diverse disciplines as theater studies, art and design, and public policy.

3 MAY

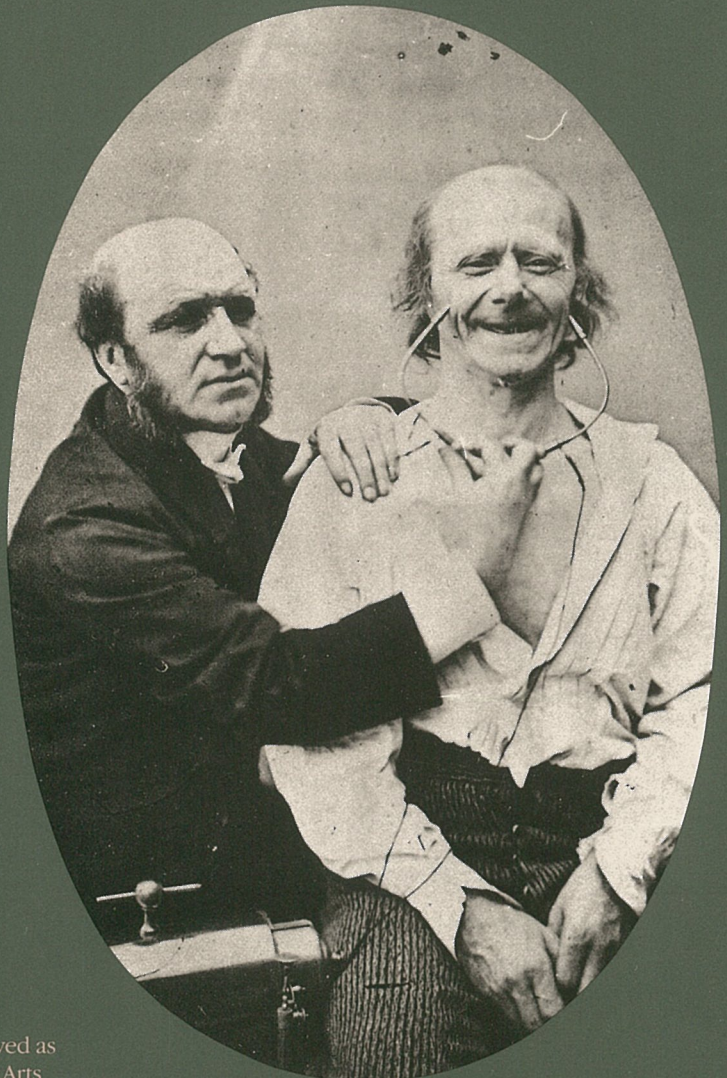

Wednesday 8:00pm 1989

Colwell Playhouse, Krannert Center for the Performing Arts
500 South Goodwin, Urbana
University of Illinois at Urbana-Champaign

First Annual Lyle Lanier Lecture

This lectureship is in honor of Lyle Lanier who served as Head of Psychology, Dean of the College of Liberal Arts and Sciences, and Provost at the UIUC campus. Professor Lanier helped assure the broad excellence of this campus, particularly as a research university, in the decades immediately following World War II.
