11:00am–11:45am

Cory SuskiCAS Associate 2022–23, Natural Resources &
Environmental Sciences*Enhancing Conservation and
Management of Muskellunge Fisheries*

Recreational fishing is a popular past time around the world. Successful management of recreational fisheries requires a synergy between anglers, managers, and fish populations. The current project describes a series of studies intended to better understand angling vulnerability and spatial ecology of muskellunge in Illinois, and use that information to help both anglers and managers achieve their respective goals.

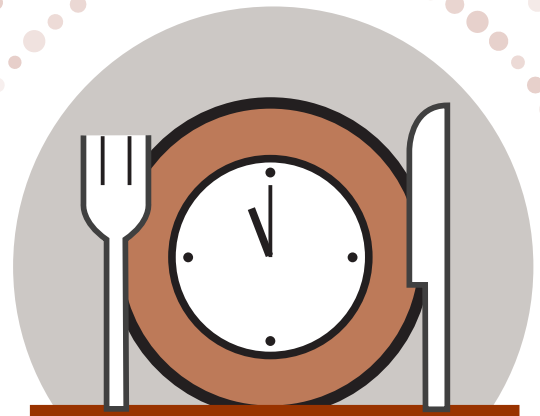

Noon–12:45pm

Craig Koslofsky

CAS Associate 2022–23, History

*“The Piercing of the Ear”: Whiteness,
Skin, and Slavery in an Eighteenth-
Century French Portrait*

A little-known painting held at the Musée d'Histoire de Nantes depicts a white mistress piercing the ear of an enslaved child. This disturbing image, painted c. 1735, can reveal key themes in the history of whiteness, skin, and race in France and beyond in the age of Atlantic slavery.

**CENTER FOR ADVANCED STUDY****FOOD FOR
THOUGHT**

A series of public events featuring research and creative projects by recent CAS Associates and Fellows.

We are delighted to showcase the work of some of our most productive and creative faculty in this informal series of intellectually and spiritually invigorating presentations. You are invited to drop in when you can to learn about the exciting projects undertaken by our faculty.
